

RFP #516 Offeror Questions and DSS Responses

1. Question:

What are allowable costs and do allowable costs include startup costs?

Response:

Proposals should identify all costs associated which may include costs associated with start-up, however the proposal shall clearly identify one-time start-up costs vs. the on-going costs to support the program.

2. Question:

Would you clarify 1.11 Length of Contract? The RFP states that the purchase of service contract is anticipated to begin in April 2016 and end on May 31, 2016. Is this intended to be a two-month contract or is there a typo with the end date being May 31, 2017 versus May 31, 2016?

Response:

The initial contract will be through the end of the current fiscal year, and our intention would be to enter into a new contract for SFY17. Therefore, the RFP does not contain a typo.
